

Benefiting from the New Zealand eScience Infrastructure

Seminar – 9:00-10:00am, 18 July 2012 – Hosted by VUW and MacDiarmid

location

AM103

VUW, Kelburn Campus

(or via video conference, see below)

Learn what high performance computing is, what is available to you and how your work will benefit from it.

This event provides an overview of NeSI's compute resources, how to access them and what to expect when you need help.

*The seminar will be delivered by Dr **Michael Uddstrom**, NIWA's director of its high performance computing facility. He is being supported by Mark Cheeseman, scientific programmer at NIWA and Tim McNamara, NeSI's lead for community development and communications at The University of Auckland.*

topics covered

- what NeSI is and what it provides
- differentiating NeSI from BeSTGRID
- support provided to researchers
- how to access the facilities

audience

Researchers

Scientists

Students

Post-docs

IT managers

Research supervisors

video conferencing available

If you would like to attend remotely, you are very welcome. Please ensure that you RSVP for details.
